Your Hackathon Journey

Mentoring Program Overview

Duration

October 1–30, 2026
4 weeks of guided mentoring

Mentor Organizations

AWS, SAP, BINUS University
& APP Group

100% Voluntary

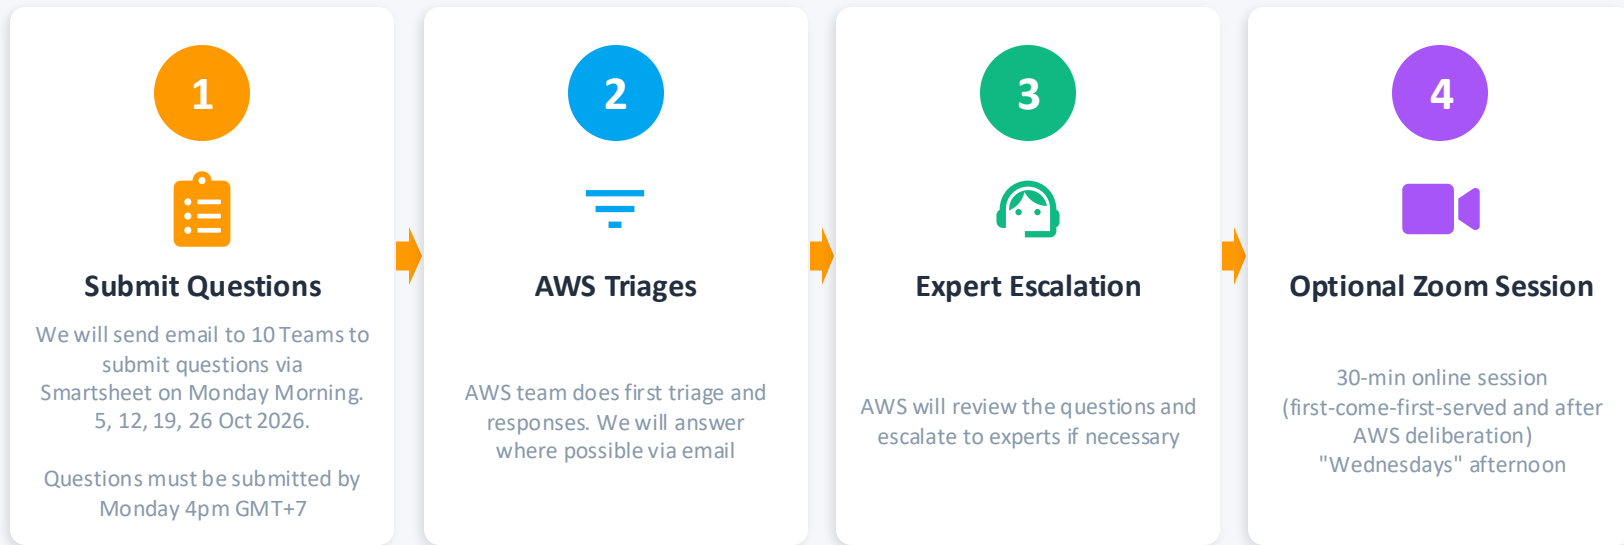

Participation is optional.
ZERO influence on judging
or final score.

Two Tracks

Intelligent Supply Chain
& Intelligent Manufacturing

How Mentoring Works

 **Zoom sessions are optional** — They do not influence any winning outcome. | 4 × 30 min weekly | First-come-first-served

Mentoring Guidelines for Teams

Guide, Don't Build

Mentors help you think through your approach — not code for you

30-Min Time Limit

Sessions are strictly time-boxed. Be concise and prepared.

Confidentiality

Your approach stays private. No cross-team sharing.

Be Prepared

Submit clear, specific questions to make the most of your slot.

Be Respectful

These are volunteers. Respect their time and other teams' slots.

No Score Impact

Using or skipping mentoring has zero influence on your score.

Free AWS Learning Resources

AWS Skill Builder

Free access to curated learning paths on Generative AI, Amazon Bedrock, Kiro, and Agentic AI

AWS Free Tier Accounts

New AWS accounts with Free Tier credits — build and test real solutions on AWS infrastructure

Kiro Free

Access to Kiro AI development environment for rapid prototyping of agentic solutions.

Note : [BINUS students](#) entitled to 1000 credits/month for 1 year.

Documentation & Guides

Comprehensive guides covering Kiro, MCP Server, Bedrock Agents, and SAP AI Core integration

Voucher

FREE certification!

How to earn badges: Publish articles, comment, maintain daily streaks, vote on Wishes, and engage with the community on **AWS Builder Center**

Exam options: AWS Certified Cloud Practitioner (CLF-C02) or AWS Certified AI Practitioner

⚡ Pro tip: Start your badge journey right after the workshop! First rewards arrive in ~2 weeks; the exam voucher takes ~90 days of daily engagement.

Free SAP Learning Resources

SAP Learning Hub — Student Edition

Free for verified university students:

- Learn from SAP experts in live sessions
- Access live SAP environments
- Gain practical hands-on experience

Verify with your university email to unlock

Self-Paced Courses:

- Introducing Joule & Joule Studio
- Agentic AI Opportunities
- Designing Agentic Systems
- Joule for Business Users

2 FREE

SAP Certification Exam
Attempts Per Year

Industry-recognized credential at zero cost

Community & Hands-On Practice

- Complete Joule Studio Resource Hub
- Hands-on LLM practice system
- SAP Generative AI Hub exercises
- Free SAP Build basic trial offering a 30 days renewable access to SAP Joule Studio

SAP BAIP Sub-Account Access

Explore SAP Joule & AI Capabilities — For Free

Upon request, SAP Team will provide interested participants with a SAP BAIP sub-account to explore SAP Joule, AI Core, AI Launchpad, and other SAP AI capabilities for this hackathon.

What You Get

SAP BAIP sub-account with access to Joule, AI Core, AI Launchpad, and Generative AI Hub for hands-on exploration and prototyping.

How to Request

Express your interest by contacting the AWS team via email or Smartsheet. SAP Team will provision your sub-account upon request.

Why It Matters

Get real hands-on experience with enterprise-grade SAP AI tools. Build and test your agentic solution on actual SAP infrastructure.

This is optional and available upon request — not required for hackathon participation.

Without the above, Joule Studio Agent Builder will not be available. Pro-Code CLI (SAP Build Code) and AI Core will be available.

What to Expect at the Finals (TBC)

Oct 31 (Final/Demo Day)

08:45	Welcome Speech
09:00	APP Group: AI Vision for Manufacturing & Supply Chain
09:30	Track A&B Presentations — Batch 1 (Teams 1–20)
12:00	Lunch Break
13:00	Track A&B Presentations — Batch 2 (Teams 21–20)
15:30	Break + Judges Deliberation
16:00	Winner Announcement & Award Ceremony
16:30	Closing Remarks

Things to Note

- Track A: Intelligent Supply Chain (20 teams)
- Track B: Intelligent Manufacturing (20 teams)
- Demo & Presentation in 15 min per team incl. Q&A
- Clearly articulate the Agentic AI Use-Case, Feasibility, and Impact
- Highlight the use of Agentic AI aspects such as: Plan, Reason, Act/Tool, Review, Orchestration/Workflow, Human in the loop, Responsible AI

Demo Day Tips

01

Tell a Story

Problem → Solution → Impact.
Don't just show tech — show why it matters.

02

Show, Don't Tell

A live working demo beats slides every time.

03

Master Your Timing

Practice your 15-minute slot.
Include buffer for Q&A.

04

Know the Criteria

Study the judging rubric and optimize your presentation.

05

Highlight 'Agentic'

Show autonomous decisions, multi-step reasoning, tool use.

06

Anticipate Questions

Prepare for tough questions on scalability and real-world use.

Judging Criteria & Scoring

20%

Working Solution & Demo

Live demo of a functional
agentic prototype

20%

Technical Execution & Use of AWS/SAP

Correct, purposeful use of
AWS & SAP AI services

20%

Problem-Solution Fit & Impact

Clear pain point with
quantified value delivered

25%

Innovation & Originality

Fresh angle beyond obvious
baseline solutions

10%

Presentation & Storytelling

Crisp narrative with clean
architecture diagram

5%

Q&A / Ability to Defend

Confident, accurate responses
to judge questions

Deliberation: Final rank = average of all judges' scores | Each judge carries equal weight

Frequently Asked Questions (FAQ)

Q1

Bolehkah membangun agent/frontend dengan stack sendiri (misalnya LangChain) dan mengintegrasikan via A2A/MCP/REST API?

Peserta diperbolehkan menggunakan stack sendiri. Demo bisa dijalankan melalui Joule atau Agent yang lain, seperti Strands, Quick, etc. Integrasi boleh menggunakan A2A/MCP/REST API.

Q2

Apakah kompetisi mensyaratkan data riil atau membolehkan data sintetis/simulasi?

Data sintetis diperbolehkan, asal realistik dan relevant dengan use-case yang akan didemokan.

Q3

Apakah MVP cukup berupa working prototype dengan mock data, atau harus sudah terintegrasi agent orchestrator?

MVP yang diharapkan adalah working prototype dengan agent yang bisa planning, reasoning dan tool execution. Selama prototypenya memberikan solusi terhadap business challenge, ini cukup untuk didemokan. Penggunaan agent orchestrator akan mendapat poin tambahan.

Q4

Apakah dokumen pendukungnya cukup berupa proposal saja, atau ada dokumen tambahan lain yang perlu dilampirkan?

Pengumpulan proposal untuk saat ini cukup untuk kualifikasi. Pada Final/Demo Day, kita akan meminta semua Finalist untuk mengumpulkan semua demo dan presentasi sebagai artefact dari event ini.

Frequently Asked Questions (FAQ)

Q5

Untuk masa develop product nya dimulai dari tanggal berapa sampai tanggal berapa?

Finalist akan ditentukan tanggal 21 Sep 2026, jadi bisa di develop mulai saat itu sampai Final Demo Day tanggal 31 Oct 2026.

Q6

Kalau nanti kami submit proposal, akan tetapi realisasinya berbeda dari yang ada di proposal bagaimana? Maksudnya, seandainya proposalnya lolos babak penyisihan, dan ide proposal nya berubah seiring banyak informasi yang kami dapatkan, sehingga ikut mempengaruhi hasil eksekusi dari rancangan awal, apakah hal tersebut diperbolehkan?

Perubahan kepada use-case ini diperbolehkan, asal ada justifikasi dan penjelasan yang jelas.

Q7

Untuk demo dan presentasi di final, apa bahasa yang harus dipakai English atau Bahasa Indonesia?

Untuk demo dan presentasi di final, kita akan pake bahasa inggris, karena ada juri2 dari internasional juga
